

Mandatory Language for Monitoring and Reporting Violation
Chemical Sampling
CHEMICAL MONITORING, ROUTINE MAJOR

The **SJWTX Triple Peak Plant** water system **PWS ID TX0460172** has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Public water systems are required to collect and submit chemical samples of water provided to their customers, and report the results of those samples to the TCEQ on a regular basis.

We failed to monitor and/or report the following constituents Total Haloacetic Acids (HAA5) and Total Trihalomethanes (TTHMs)

This/These violation(s) occurred in the monitoring period(s) 10/01/2023 - 12/31/2023

Results of regular monitoring are an indicator of whether or not your drinking water is safe from chemical contamination. We did not complete all monitoring and/or reporting for chemical constituents, and therefore TCEQ cannot be sure of the safety of your drinking water during that time.

We are taking the following actions to address this issue:

The Texas Water Company expedited payment to laboratory to release results of samples that were conducted during this period for TCEQ review and are currently re-evaluating our payment process to ensure no further administrative oversight within our accounts payable department.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact Ronnie Rodriguez at (830) 730-7240.
